
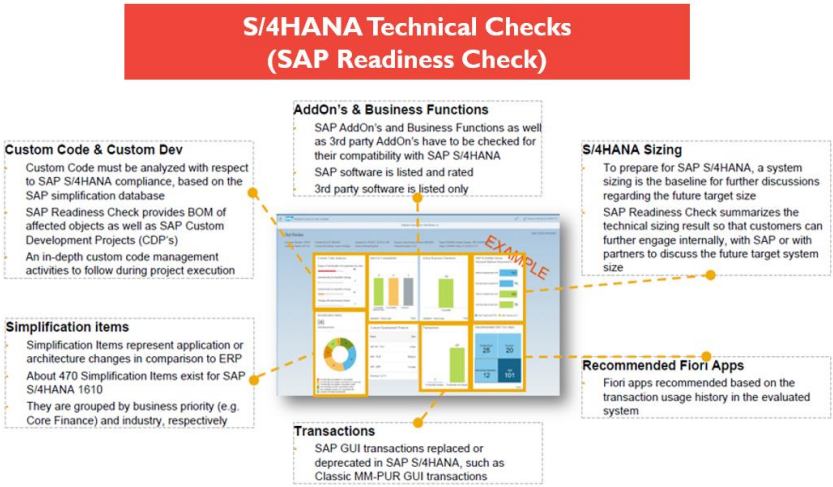
RISE with SAP

Some important steps to **convert** customer to S/4HANA in a RISE with SAP project



#1 – Technical Preparation (Basis Consultant)

- **SAP Readiness Check** - SAP assessment Tool to review implementation aspects, offering technical orientation to guide migration of:
  - Conflicting Add-ons
  - Conflict Business Functions
  - Maintenance Planner

- **ATC – Custom Code** - Compliance verification process of developments for S/4HANA compatibility.

- **Simplification Item Check** - Blocks / Actions and Fixes to be applied in the new environment

SAP S/4HANA System Conversion: Realize Phase

#4 – Technical Conversion with SUM (DMO) (Basis Consultant Developer (SPDD/SPAU)

- **SUM - Software Update Manager – for system conversion:** At this stage, the technical activities of database migration, software update and data conversion are carried out

- **Post migration Activities:** Activities required after the conversion is complete to enable operations to resume in the environment. These activities are also described in the delta list:
  - Adjustment in ABAP objects
  - FI/CO Data Migration
  - Activation of Material Ledger: This activation is a prerequisite of S/4HANA
  - Roll-back simulation: a roll-back simulation is foreseen in this step, to measure the necessary times if this is necessary at the time of the PRD conversion.

RISE with SAP
