

# How to Send Email from SAP ABAP Query Report ?

033,014

## Introduction

In SAP most of the time when we create a ABAP Query report we do it to download it to our Local file and then we need to send it to a bunch of Recipient. This Blog will help you in taking some of this Steps reduced by Sending email directly from the ABAP Query Report.

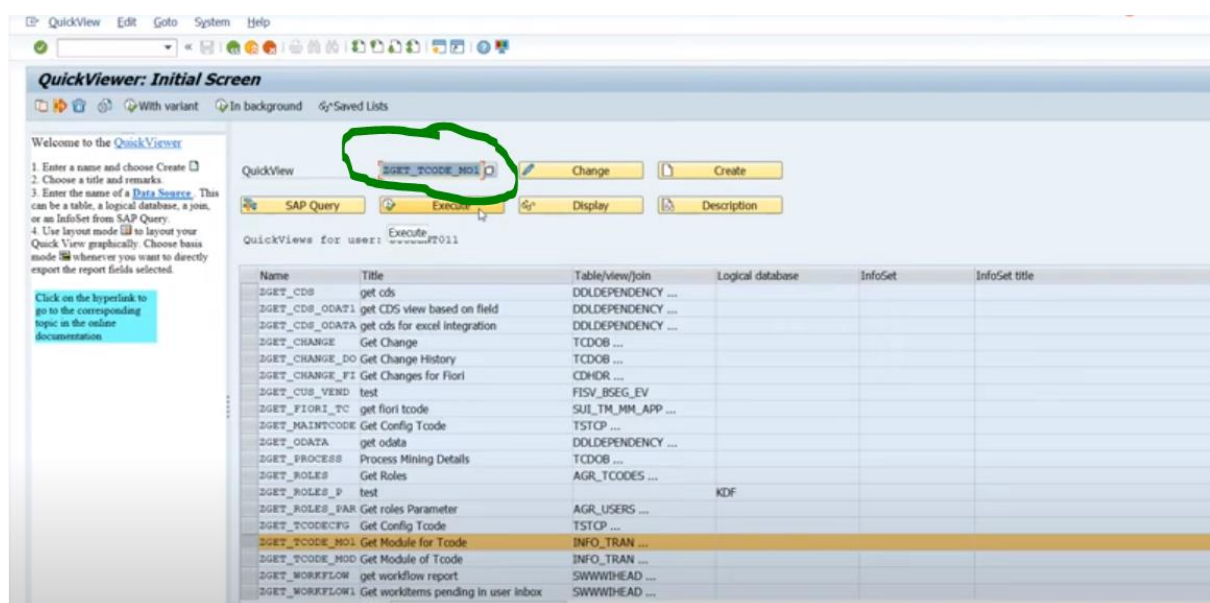

## Solution

First we go to **Transaction Code SQVI**.

Select your ABAP Query. If you want to know how to create ABAP Query please check the below Link

<https://blogs.sap.com/2020/07/17/how-to-find-cds-views-by-just-knowing-the-field-name-in-sap-ecc-and-sap-s-4-hana/>

After selecting the Query please hit Execute or F8 in Keyboard.

Now execute based on the Parameter you want the Report to get details

**Get Module for Tcode**

Report specific selections

Transaction Code: /IWFND\* to

Application Component: to

Language Key: EN to

Short text: to

Output specification

Layout:

Data Aging

Data Aging Temperature:

Now select the below option as mentioned.

**Get Module for Tcode**

Spreadsheet

Local File

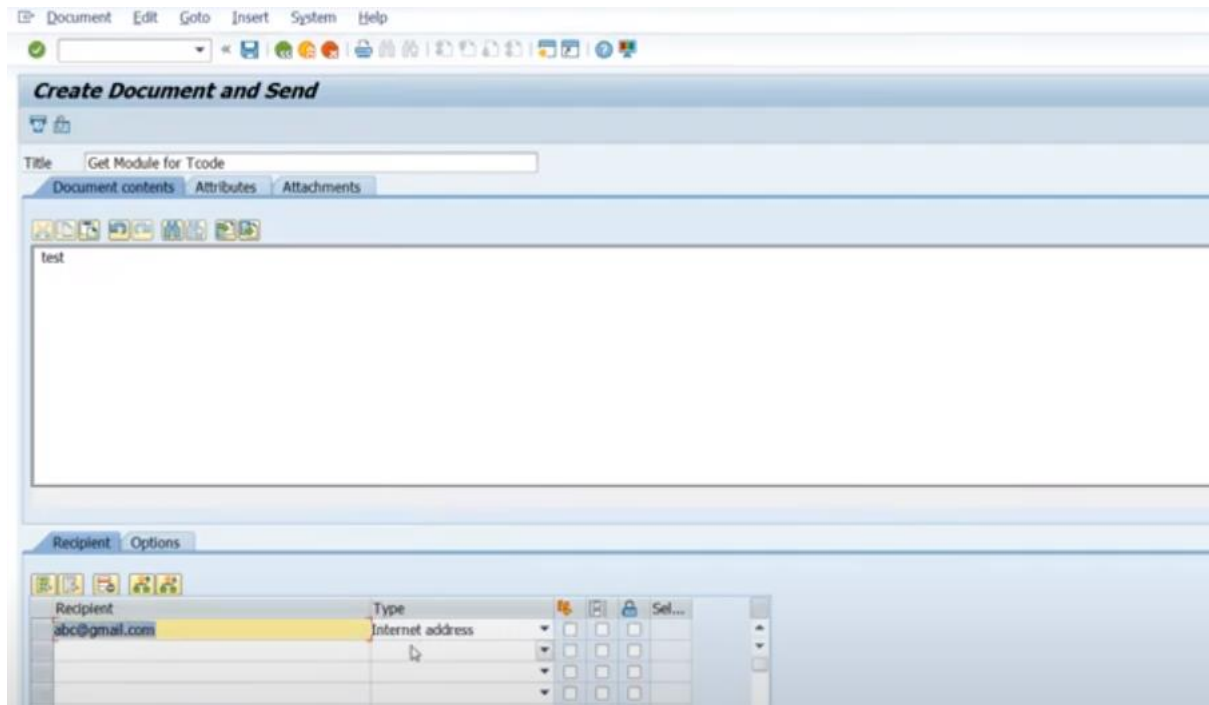

Send

SAP Office Folders

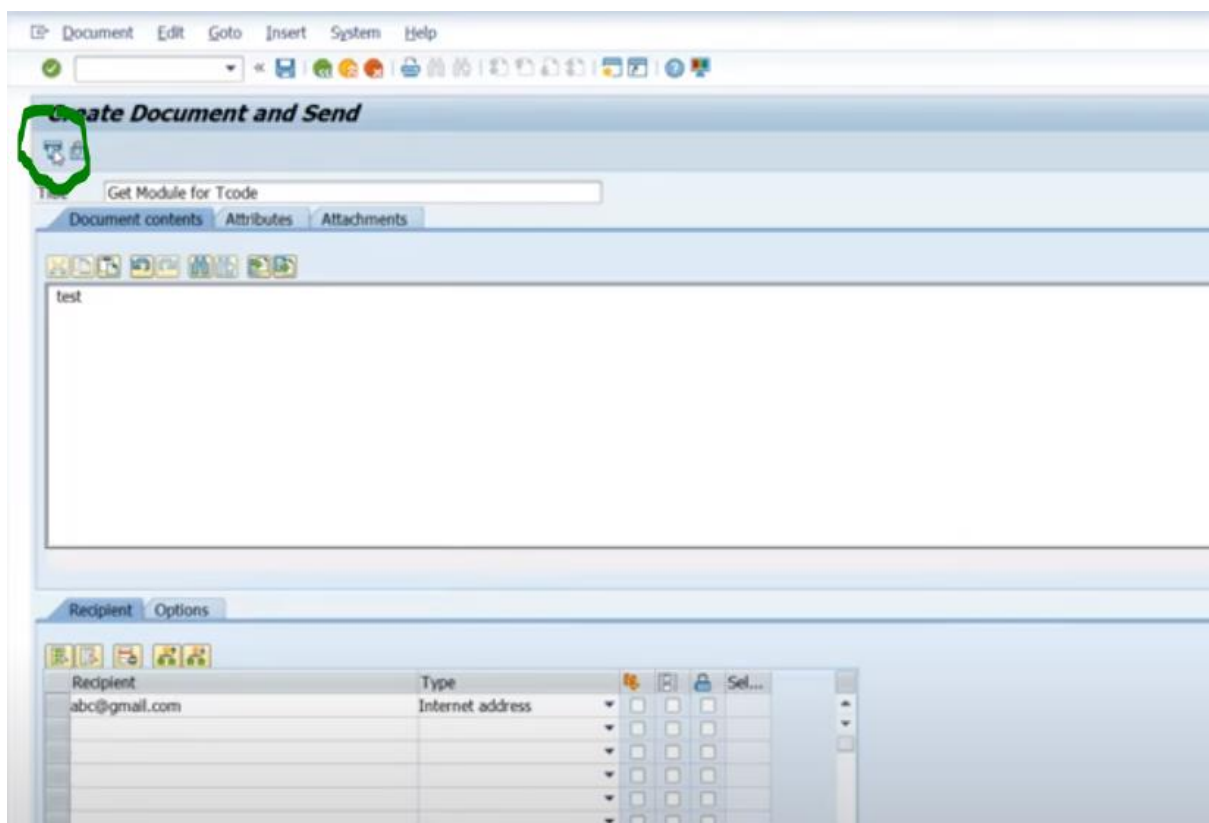

ABC Analysis

TCode	Package	Component	Language	Short text	Transaction text

We get the Compose Email Screen. Enter a Text in the Body and provide Recipient as mentioned below

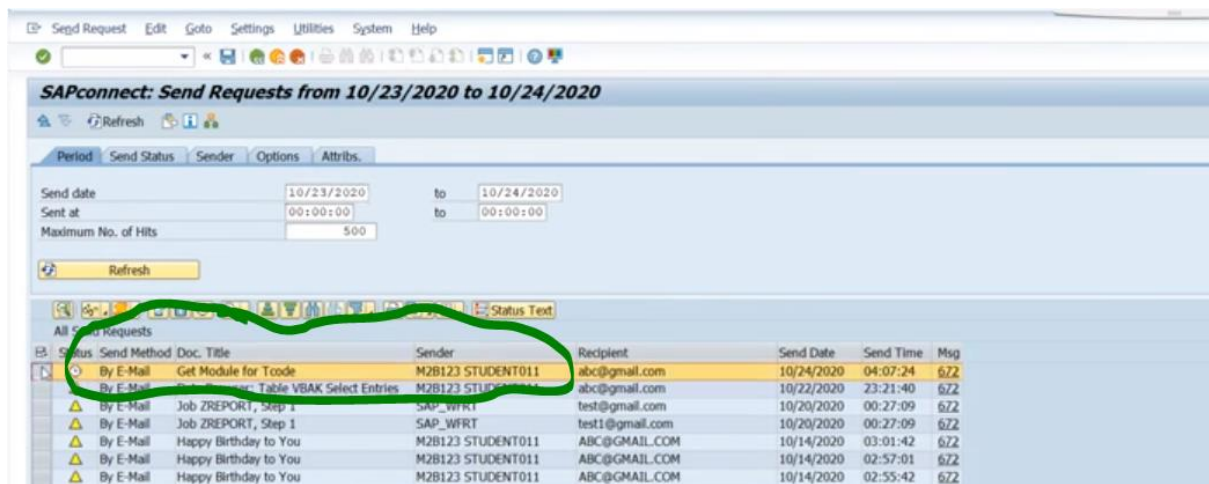

Now hit Send Button as highlighted below

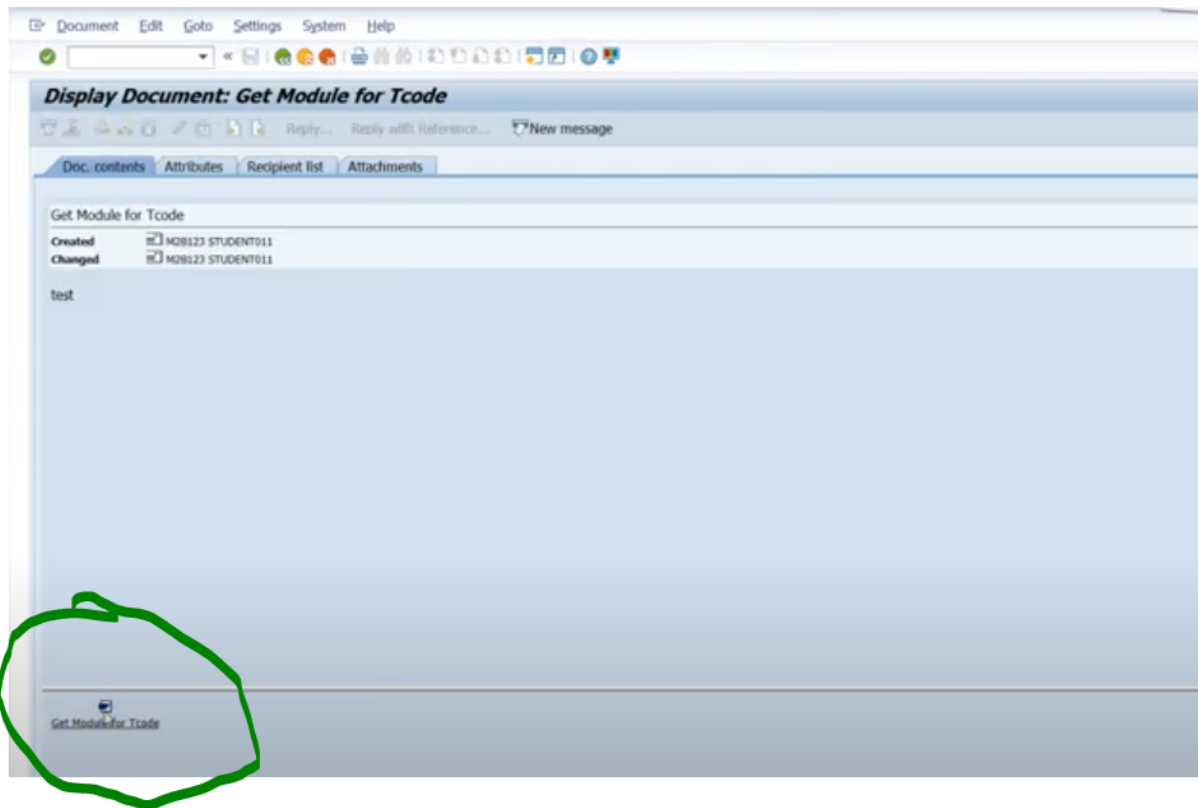

Now let us go to Transaction SOST to check the outgoing email

Here is the entry. Highlight it and hit display.

Now Click on Attachment.

Here is the output which will show in the Email Attachment
