

# How to Generate a Notification when any Business Partner/Vendor/Customer is changed in SAP S/4HANA

15144,678

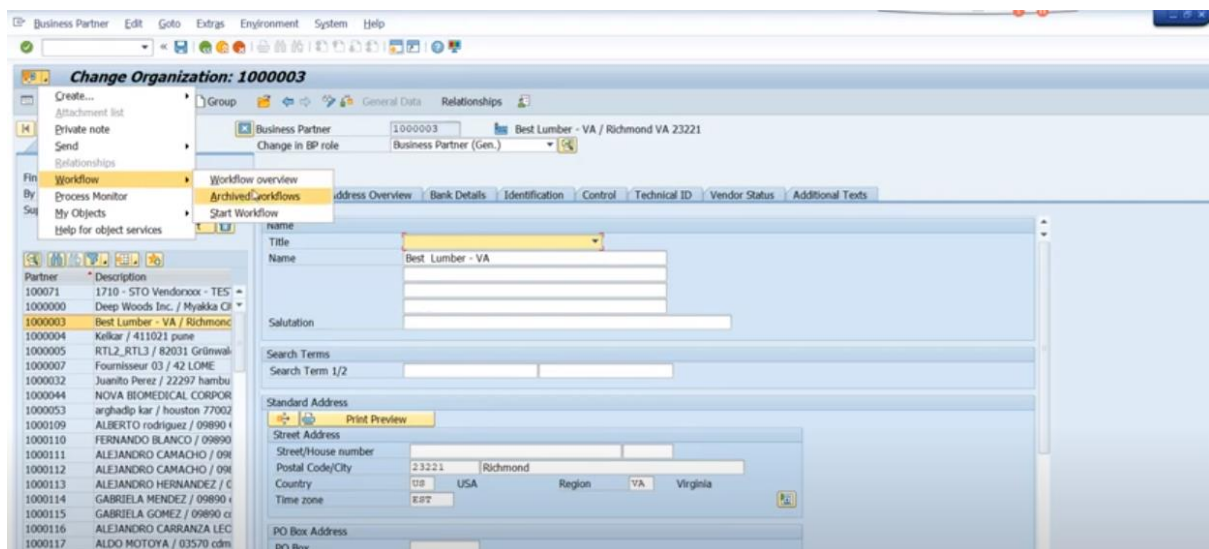

[Edit](#)

## Introduction

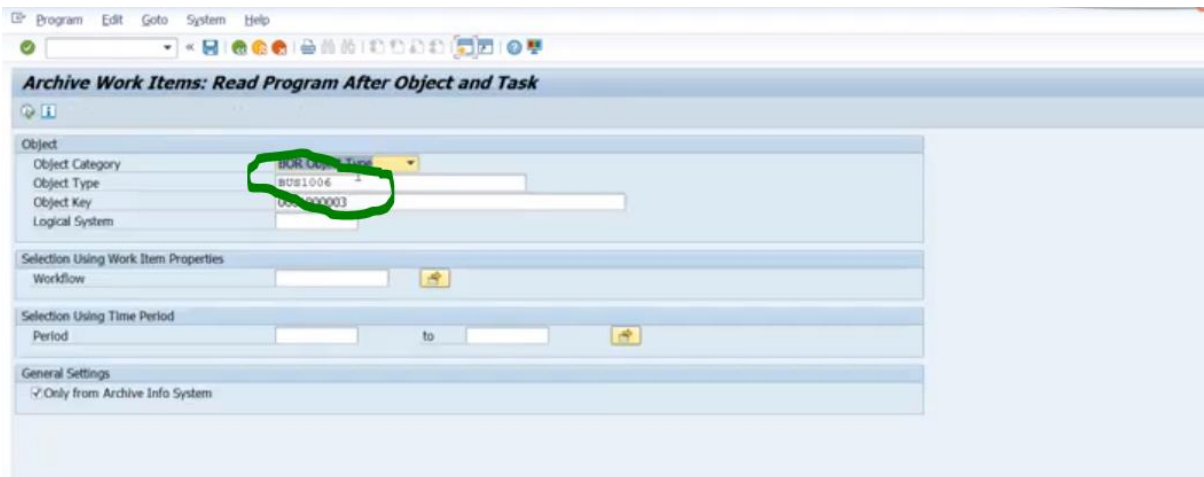

In SAP S/4 HANA there are some major change in Simplification. Simplification means getting rid of Redundant Functionality. One of this is the Introduction of Business Partner as Vendor/Customer/Employee. The below blog helps in Generating a Notification when any Business Partner/Vendor/Customer Is changed in SAP S/4HANA

## Solution

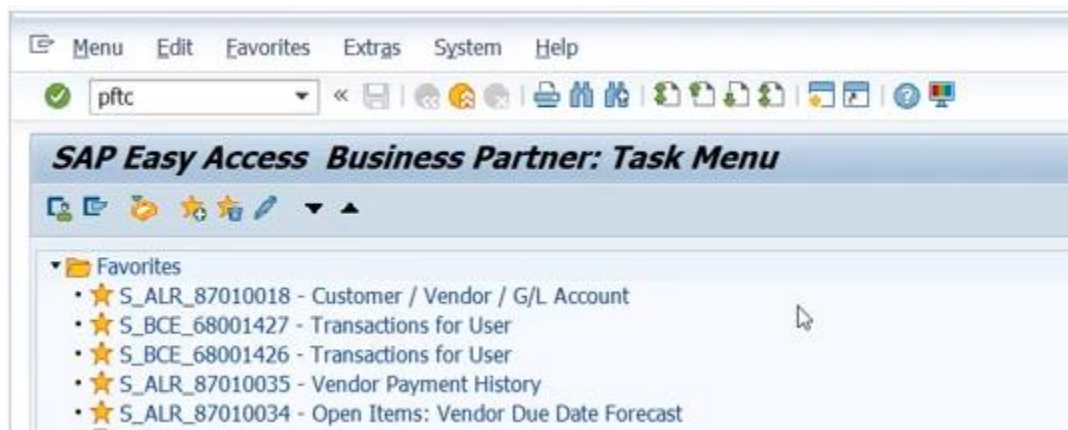

Please go to Transaction Code BP and the search for any BP and follow the below steps in GOS

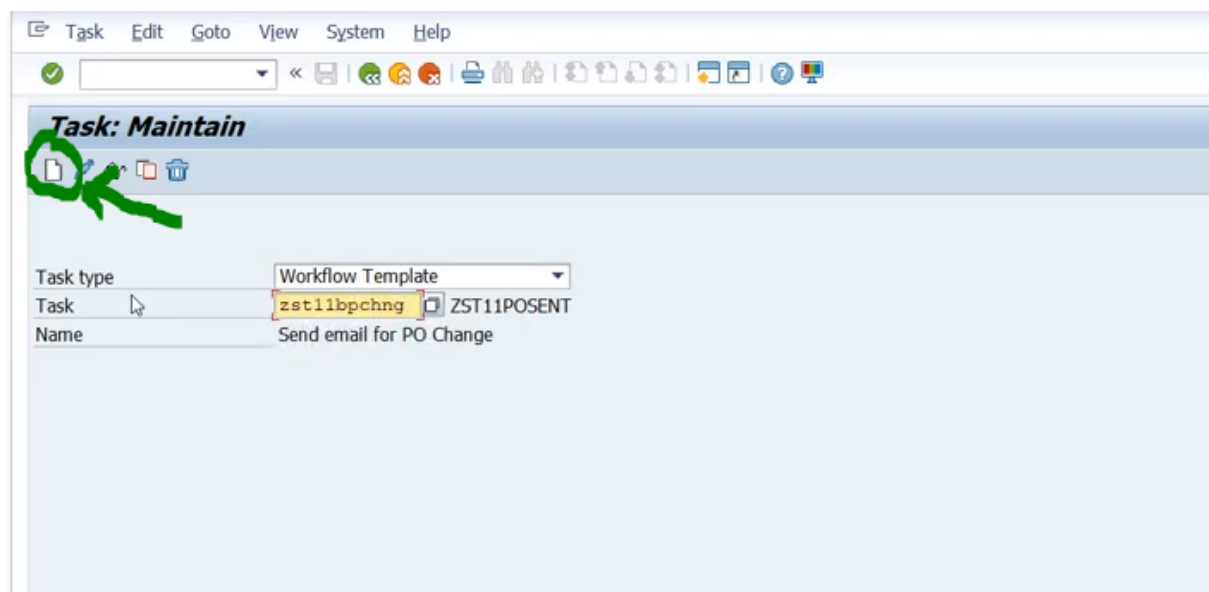

We get the Business Object of the Business Partner

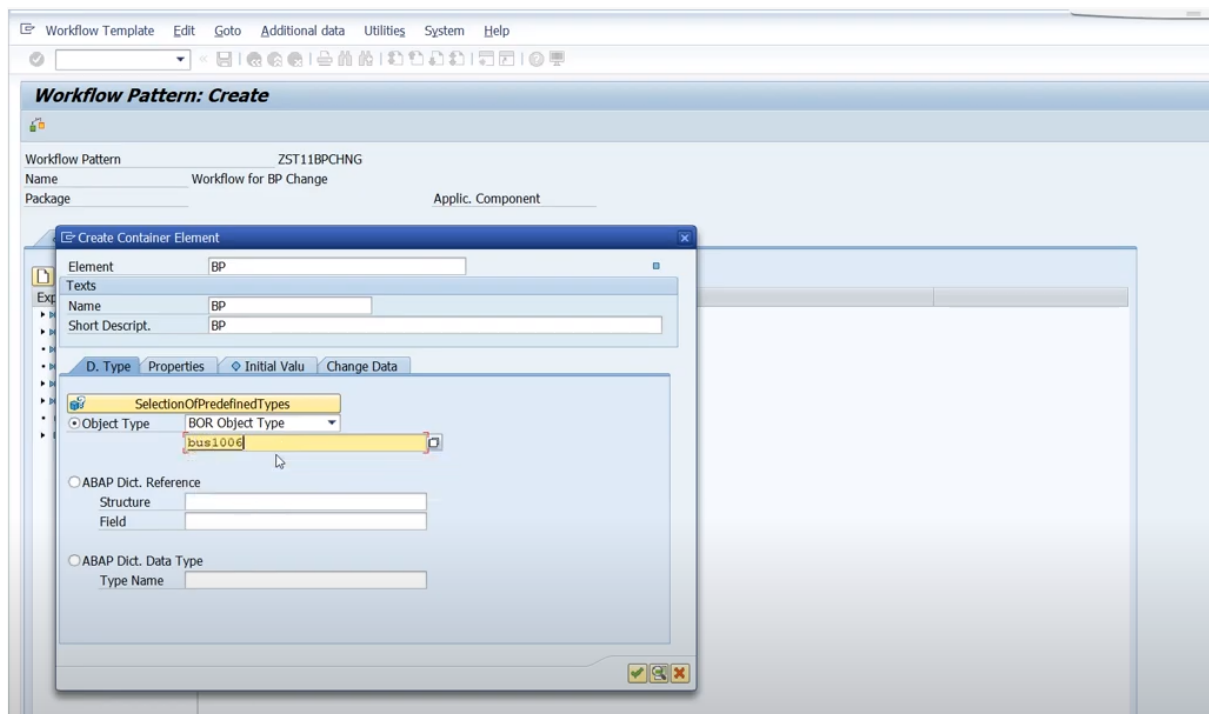

Now let us go to Transaction Code **PFTC** to create a Workflow Template

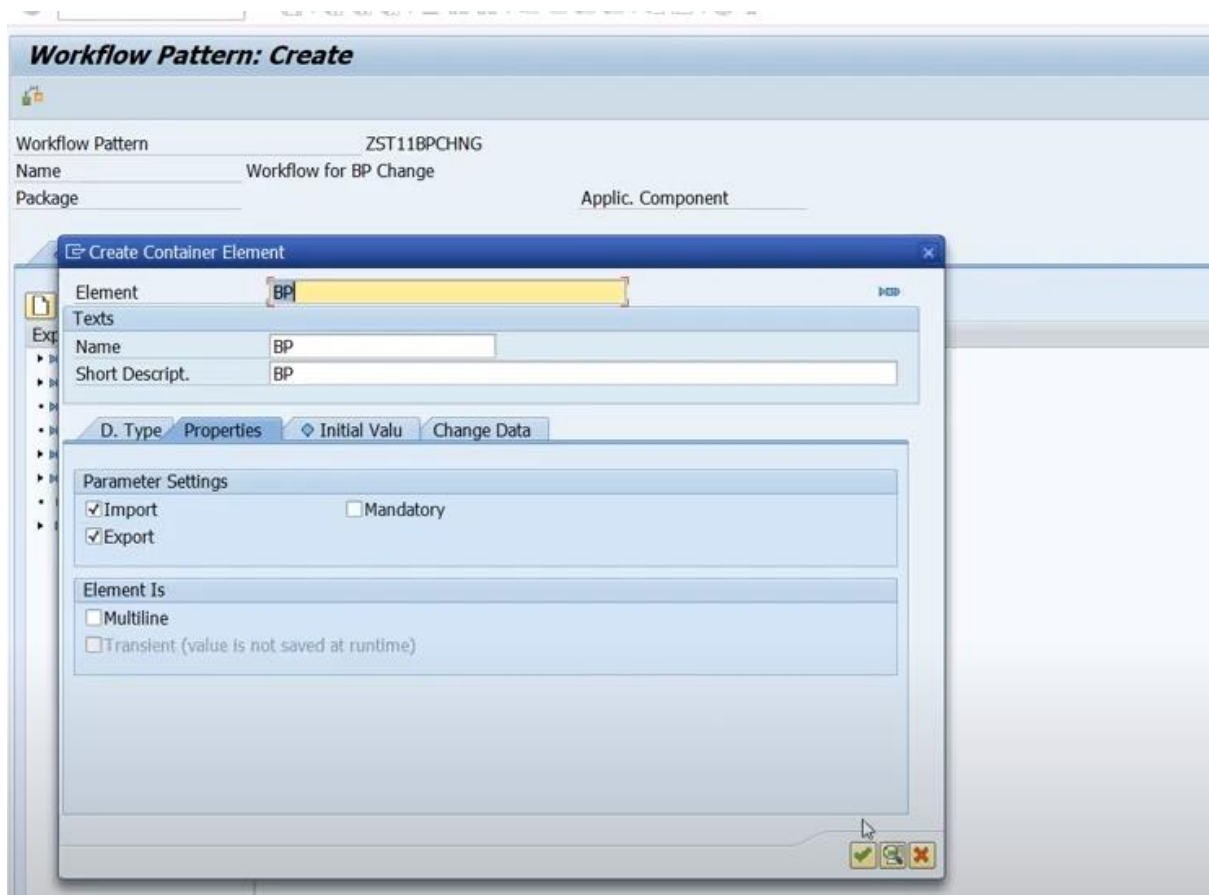

Enter a Name for the Workflow Object starting with Z or Y as it is custom

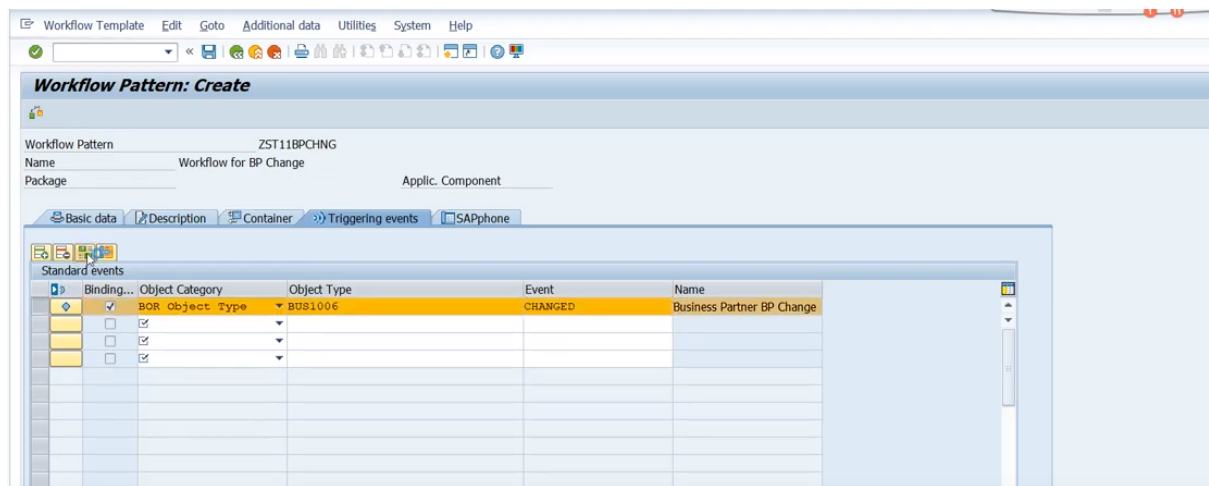

Now create a Container Element BP Referencing Business Object

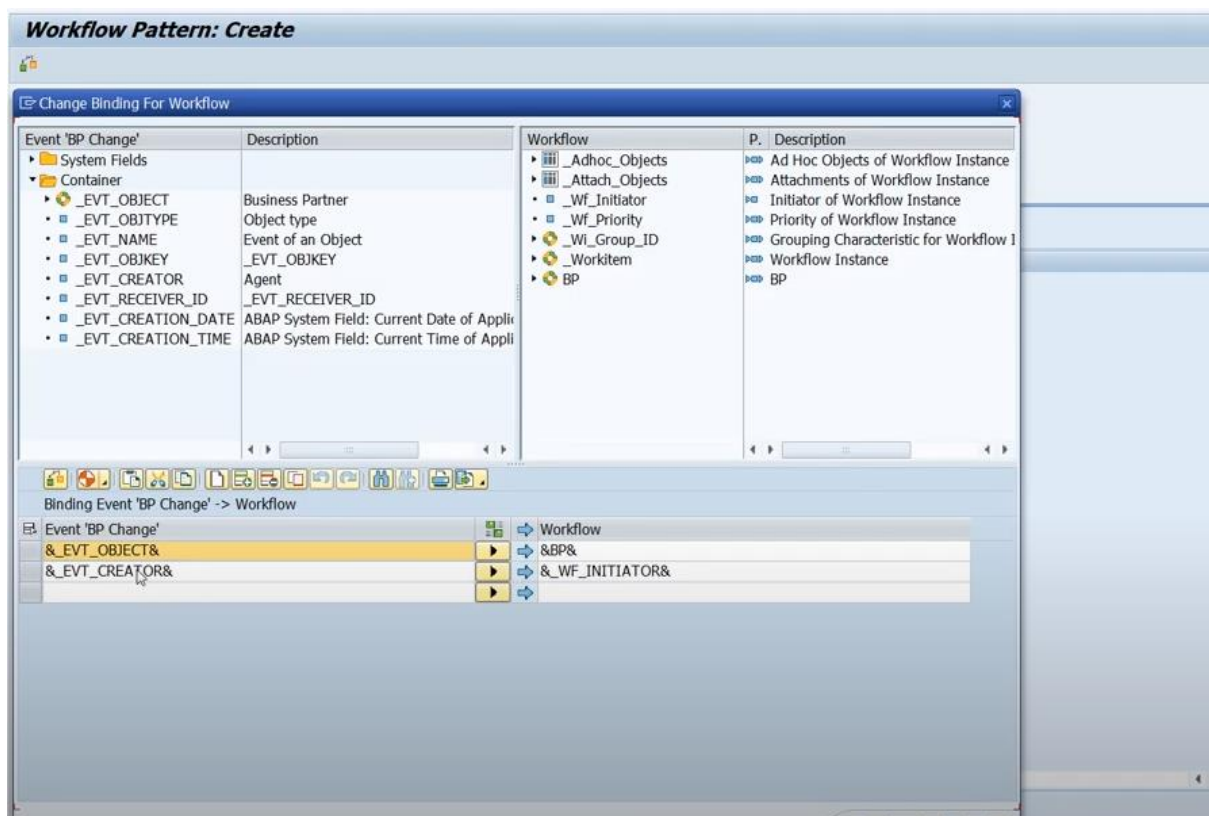

Select Import and Export Flag

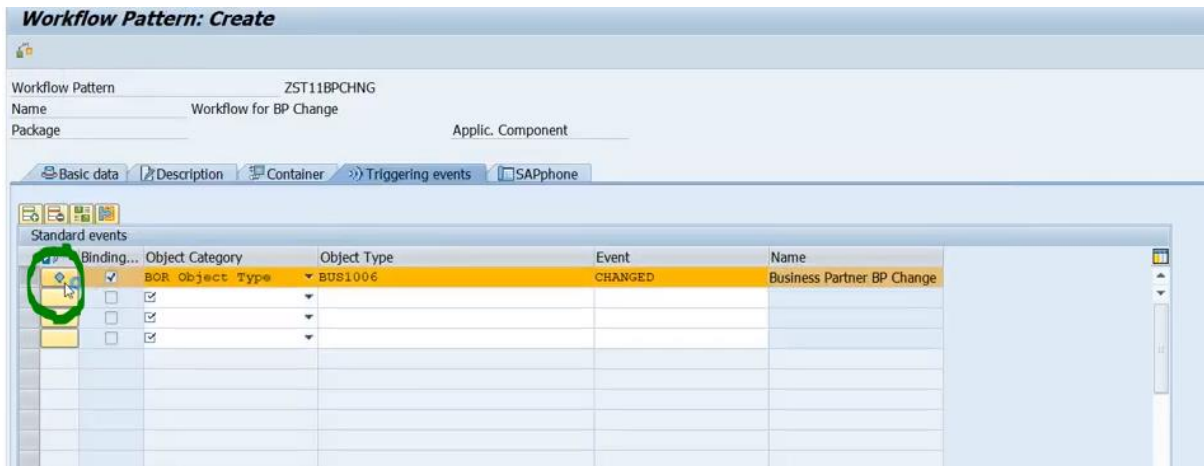

Now maintain the Entries below

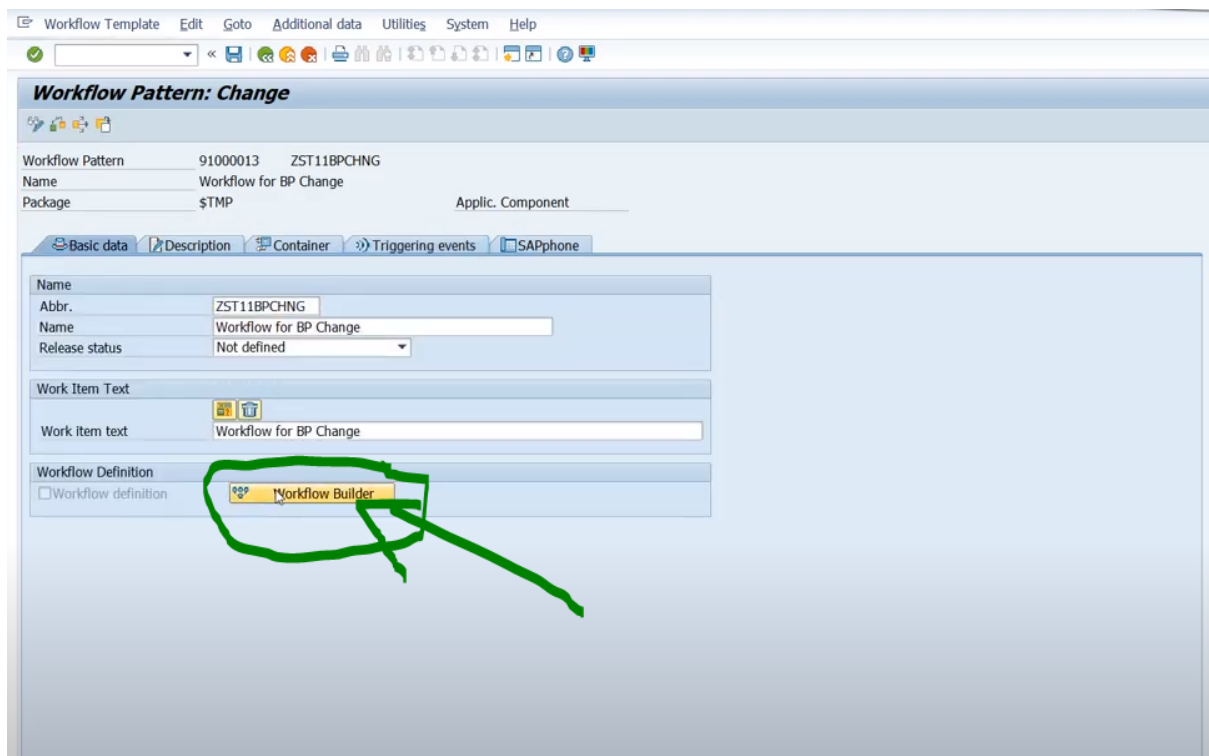

Now maintain the Event Linkage

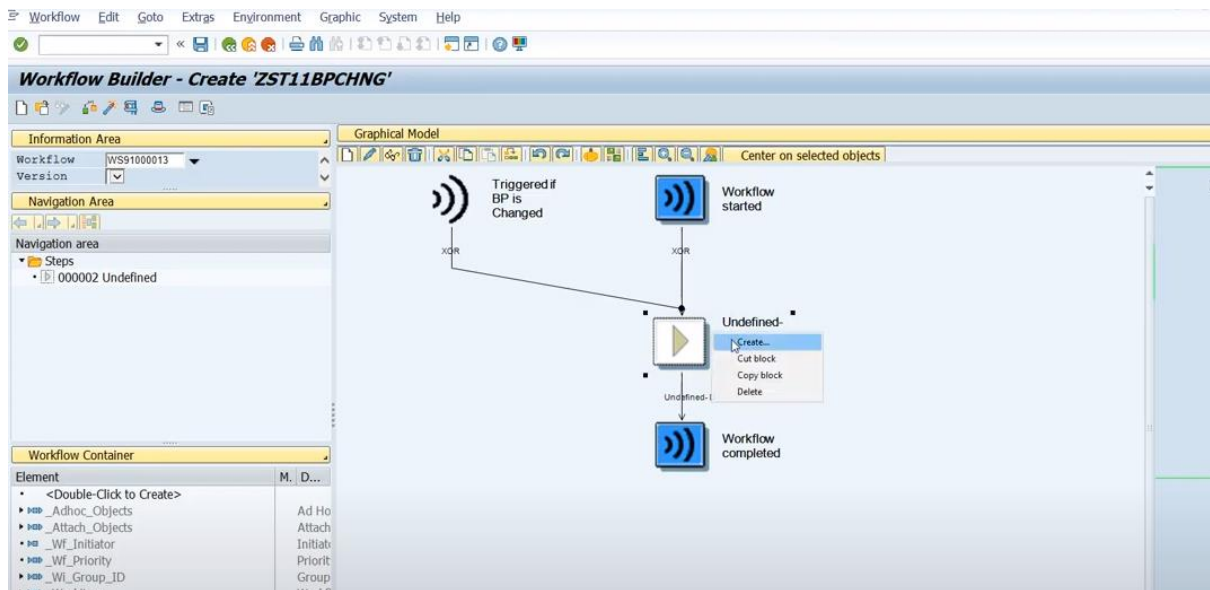

Now Activate the Event Linkage

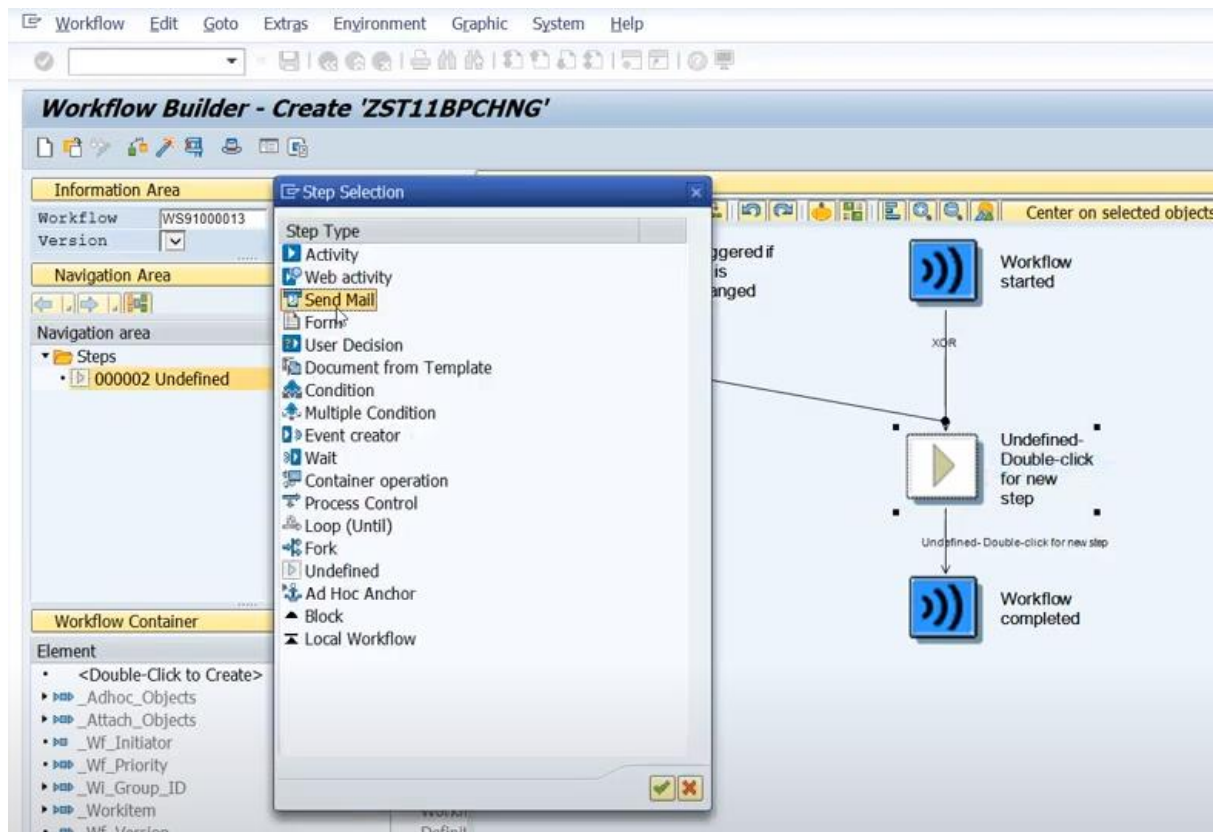

Click on Workflow Builder

Now we right Click and create the Step

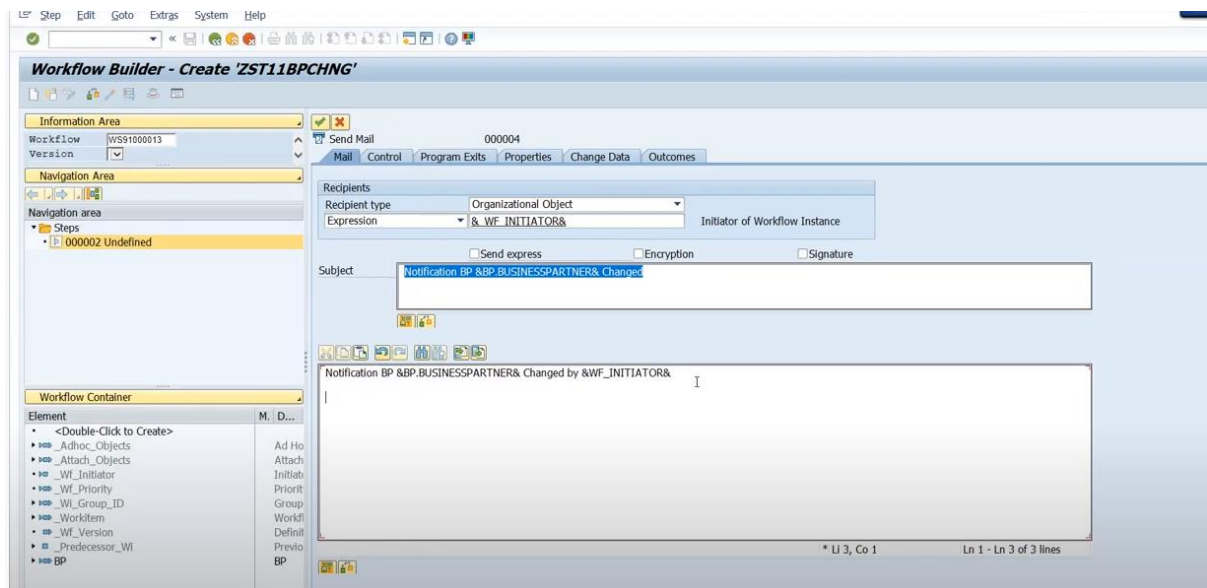

Double Click on Send Mail Step

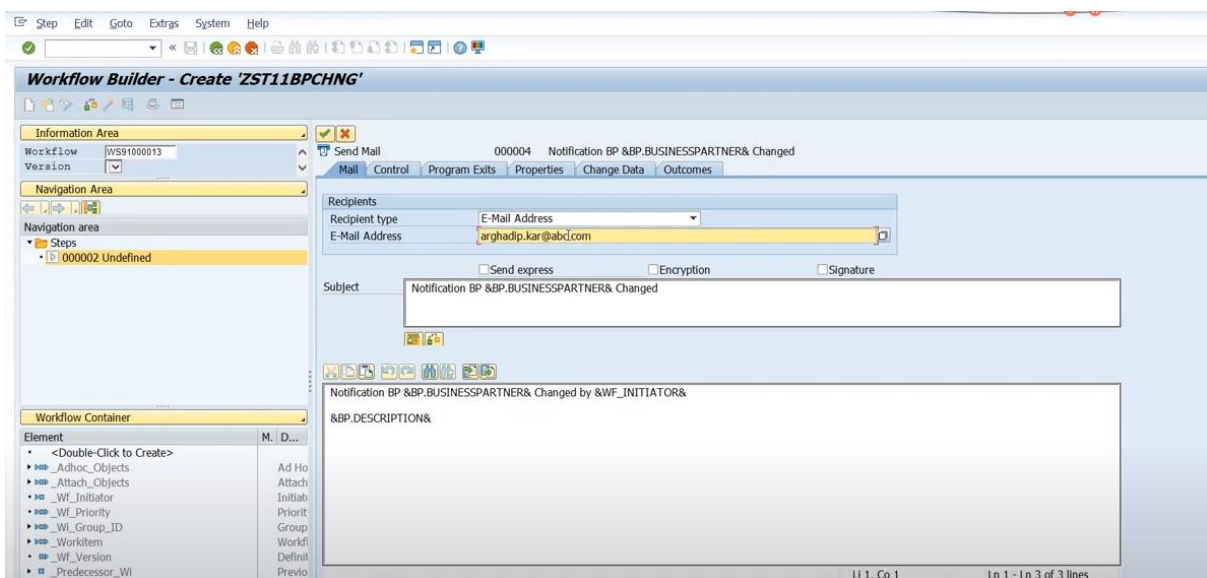

Provide the below information as mentioned below

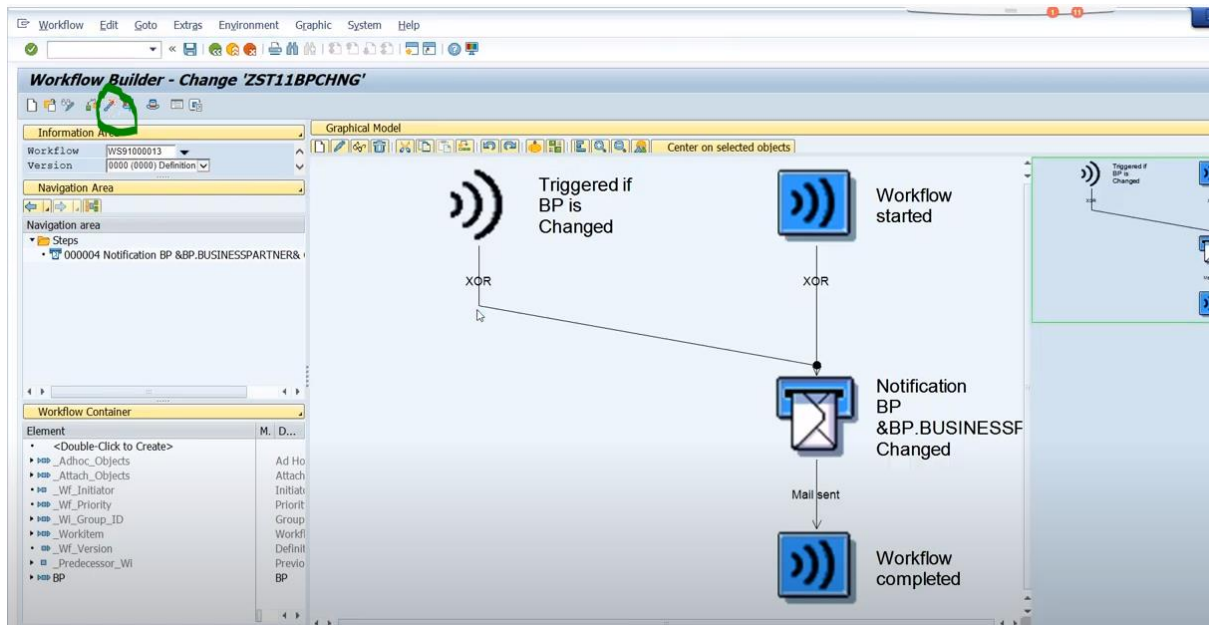

Provide the email address. I have hardcoded here for simplicity. Ideally you should define a Container element that will be populated programmatically

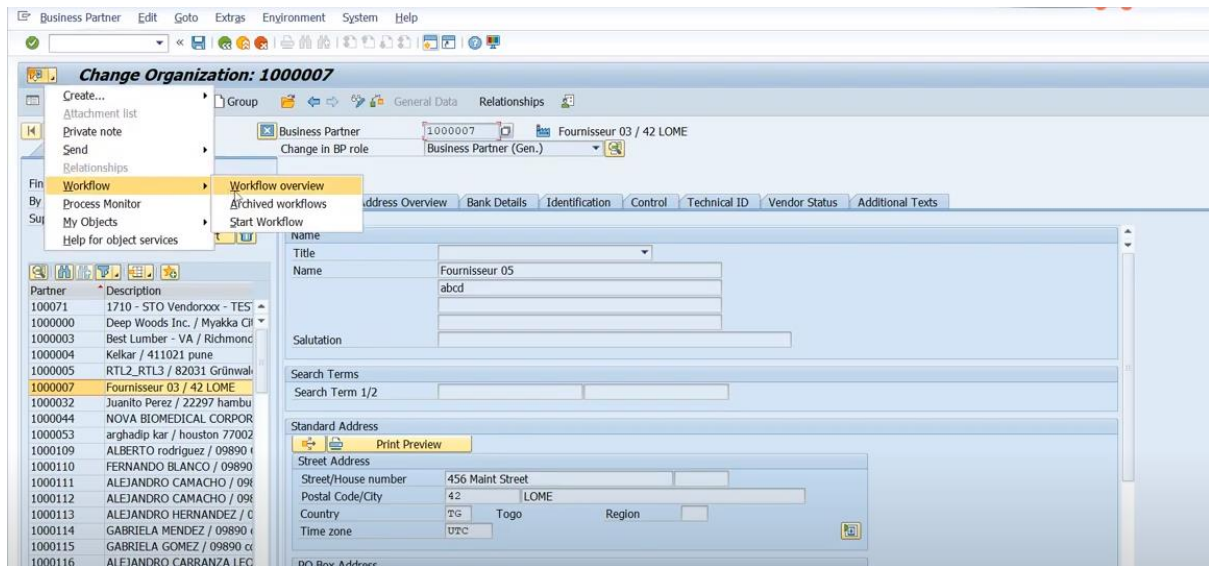

Now activate the Workflow Template

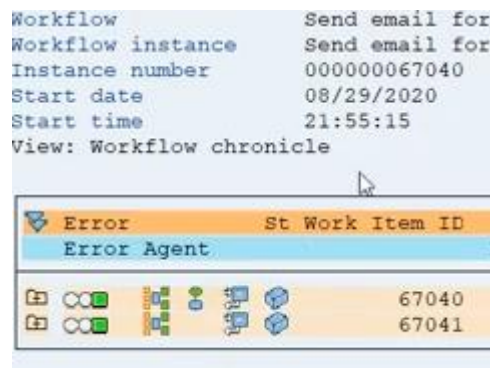

Now let us test it. We are making a change in the description.

Now let us check the Workflow Overview by following the below step.

Here is Workflow Log

## Conclusion

This Tutorial can only be used for SAP S/4HANA. The concept can be used for other Business Process Also.
